

Unary INDs - an IND discovery algorithm implementation

- Build inverse value index
 - Iterate over all tables of input
- IND checking
 - Start with all columns are included in all other columns
 - For each value in reverse index
 - For every column of the current value
 - Remove any columns which are not part of the current value columns

Unary INDs - an IND discovery algorithm implementation

ERROR

The algorithm execution was not successful: Error in algorithm execution. Caused by:
java.lang.OutOfMemoryError: Java heap space: failed reallocation of scalar replaced objects
