

# Unary INDs - an IND discovery algorithm implementation

---

- Build inverse value index
  - Iterate over all tables of input
- IND checking
  - Start with all columns are included in all other columns
  - For each value in reverse index
  - For every column of the current value
  - Remove any columns which are not part of the current value columns

# Unary INDs - an IND discovery algorithm implementation

## ERROR

The algorithm execution was not successful: Error in algorithm execution. Caused by:  
java.lang.OutOfMemoryError: Java heap space: failed reallocation of scalar replaced objects

OK
